of Zero-gravity

Watch TV with Ease

Stand Effortlessly

Sitting in a MaxiComfort® chair will put a smile on anyone's face! MaxiComfort is the only patented recline technology in the world that can glide you smoothly into an unlimited number of comfort positions not found on standard power lift recliners. This exclusive line of power lift recliners is controlled by an easy to use hand control called AutoDrive, which can memorize your favorite settings.

AutoDrive™ is the exclusive hand control system for MaxiComfort® power lift recliners. This smart system has taken the guesswork out of getting in to or out of your favorite positions. The AutoDrive control assists in finding favorite comfort positions and it can memorize up to four positions.

Scan to go to the AutoDrive web page

Total Control

Operate the chair to find many of the comfort positions using just two buttons. Simplify the experience— AutoDrive can be programed to lock out the lower buttons allowing the top two buttons to operate the entire recliner.

“Up” Gently rise to the standing position.

“Recline” Gently raise the legs and feet while lowering the back.

Position Control

Enjoy all that the MaxiComfort recliner has to offer by using one of the four pre-programmed comfort positions:

“SIT” Automatically returns the recliner back to the proper seated position.

“TV” is designed for upright relaxation. This position provides the best support for someone looking to raise their feet while keeping an upright back position.

“ZG” is short for “Zero-gravity” and is a reclined position offering the feeling of weightlessness. This neutral posture allows the body to relax and rest.

“SLEEP” Lowers the back in to a “lay flat” position for a restful sleep.

“P” Stands for “program.” This button allows for the any of the four position buttons to be programmed and reprogrammed so that any position can be memorized. *This allows for activation of lockout features. Reference the user manual for additional information.*

Custom Control

Enables any person sitting in the chair to perfect their comfort position. The arrows independently move the footrest and back of the recliner. Extend the back further by using the arrow buttons and discover the Trendelenburg* position, which is used to improve circulation.

** Consult with your physician regarding using the Trendelenburg position. The Trendelenburg position is not available on the PR505-JPT.*

Up

MaxiComfort® makes life luxuriously easy. No matter what position the power lift recliner is in, MaxiComfort can have you standing easily with a touch of the  button. Answer the door, check an item on the stove, or stand to greet your loved one. MaxiComfort rises you to meet every occasion.

You can have it all in a MaxiComfort® power lift recline chair. Brought to you exclusively by the **world's leading motion experts at Golden Technologies.**

The **SIT** button moves the power recliner to the proper default seated position automatically. MaxiComfort offers an exclusive true 90° back angle found easily by using the arrows at the bottom of the hand control. MaxiComfort also features a back recline without raising the footrest.

The **TV** Watching position was designed to offer the most comfortable, neutral posture for upright relaxation. A body in the TV Watching position is recharged with ergonomic upper body support and comfort.

With both the back and the feet in the horizontal "layflat position," enjoy the power recliner for a restful sleep.

The **ZG** position was created to eliminate pressure on the body. A body in the zero-gravity position will decompress after a long day by gliding into pressure free comfort and experience a natural relaxation with minimum muscle tension.

The therapeutic Trendelenburg position was created to improve circulation in the body. Once in the ZG position, the power recliner can further elevate the legs and feet above the heart to increase blood flow and release tension from the lower extremities. A body in the Trendelenburg position receives an elongation of the lumbar area for a rejuvenating stretch.

The DayDreamer™ is a medium sized power lift recliner offering our exclusive Power Pillow articulating headrest. Recline, relax, and adjust your head position with the touch of a button.

PR630 shown in Brisa® Coffee Bean*

The Pub chair is a medium sized lift power lift recliner with a classic look, featuring a two pillow waterfall back and nail head trim on the arms and wings. Customize the comfort of the back with the use of more or less fill with the zipper back design.

PR712 shown in Geranium

Customize the size! The MaxiComforter offers a Junior Petite, Small, Medium, Medium Wide, Large or Tall size and can fit just about anyone.
